

Copying Course Content (“Components”) from One D2L Site to Another

1. Log into D2L
2. Click on the title of the D2L site you want to copy things *To*
3. Click on Edit Course in the upper right hand corner of your navbar
4. Click on Import/Export/Copy Components

5. Under the heading “What would you like to do?” choose Copy Components from another Org Unit.
6. Be sure Include Protected Resources is checked.

Export Components

Course Files: Include course files in the export package

Import Components

No file chosen

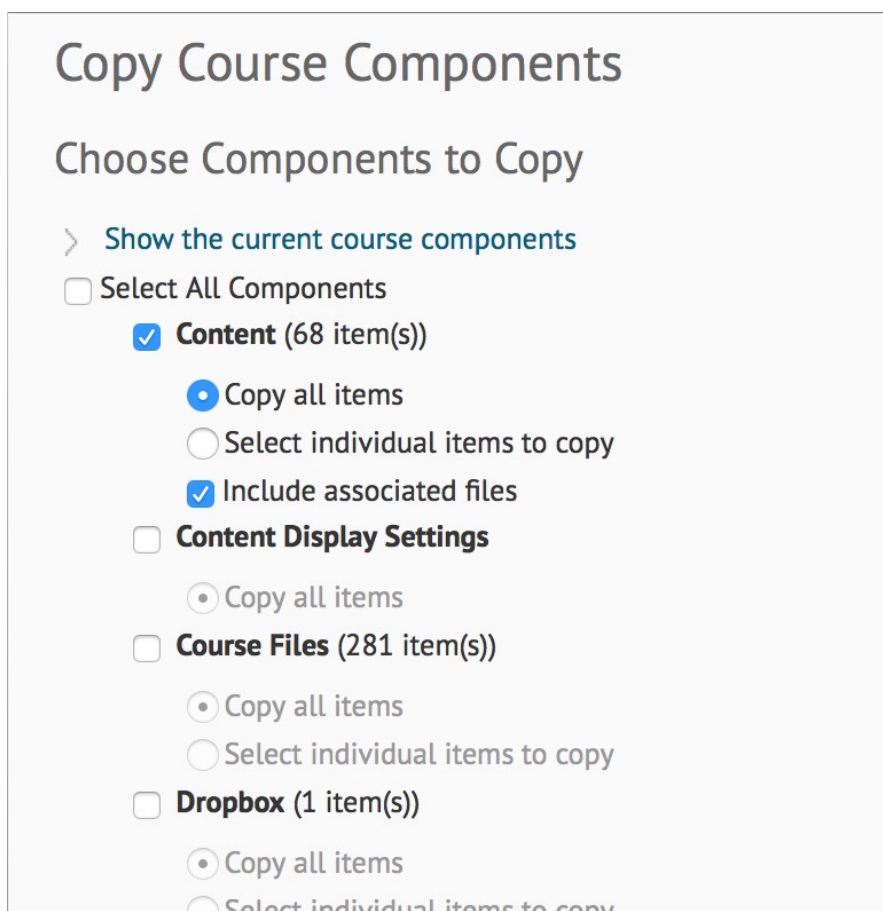

7. Click the Search for Offering button

8. In the popup window, click the magnifying glass icon to load the list of eligible course sites

The screenshot shows the 'Select Course Offering' popup window overlaid on the 'Import/Export/Copy Components' page. The popup window has a search bar with a magnifying glass icon to its right. A red box highlights the magnifying glass icon, and a red arrow points from a text box to it. The text box contains the instruction: 'Click magnifying glass icon to search for eligible course sites to copy FROM.' The popup window also includes a 'Show Search Options' link, a 'You must perform a search.' message, and 'Add Selected' and 'Close' buttons at the bottom.

9. Choose the old course site you want to copy from.

10. Click Select Components.
11. Either click Select All Components or Select Component to be copied.
12. Under “Choose Components to Copy,” select the radio button next to the items you wish to copy.
IMPORTANT: The “Include associated files” option in the Content category is on by default, meaning that there is no need to select “Course Files” as well. NOTE: To avoid complications when setting up new Groups for the current semester, you may wish to exclude “Groups” when copying components.

13. Click on the Continue button.
14. The next screen allows you to make changes or confirm what you have selected. Click Finish.
15. Wait for green check marks to appear as each Component is successfully copied.
16. Click Done.

After you've copied components into your new course site, we recommend making the following adjustments:

- Quizzes: [adjust availability](#) dates for both:
 - the quiz -and-
 - for any “submission views”, especially those that include answer keys.
- Gradebook:
 - delete “overall comments” for any copied grade items.
 - Also, make adjustments
 - if you dropped one or more items in a category at the end of the previous semester and/or
 - if you had grade calculations [treating an unentered grade as a zero](#) at the end of the previous semester.
- News, Discussions, Dropboxes, Surveys, Content, Quizzes: adjust or remove:
 - date restrictions and
 - release conditions.
- News and Discussions: if you embedded a link to a course file – even if you replaced the file in Manage Files with another of the same name – the original file will remain linked! To ensure students will have access to the linked file, delete the link and rebuild it using the file in the current course site.
- Groups: [existing group parameters and categories](#) are replicated in the new site. This could be good or bad, depending on how the current course varies from the former offering.

Be aware that after copying is complete, the navigation bar and homepage from the original site will now be active in the new course site.

D2L 10.6, July 2016
